- HP UFT

FULL STACK WEB DEVELOPER

I started my career as a software tester working for several multinational companies but the inner me was always inclined towards coding. As part of my previous job I coded for automating some petty tasks, writing scripts and test cases but being a full stack web developer is a feeling which itself drives you crazy and gives a sense of accomplishment .

What I bring with me is the experience of working in Waterfall and Agile frameworks of Software Development Life Cycle

I also bring with me the interest in learning new technologies and passionate coder who want to contribute to the organisation and to the developer community.

EXPERIENCE

Web Developer, General Assembly, Sydney, 2016, June - August

Web Developer Immersive

Web developer immersive program from General Assembly which helped me in attaining knowledge and building applications using Vanilla Javascript, jQuery, Underscore and Backbone.js (For MV* framework). During the course of bootcamp i developed some backend applications using Ruby on Rails. I have the exposure to what Angular and React frameworks are and would definitely be interested to work on those technologies going forward.

Software Testing and Automation Engineer 2006 - 2015

Worked in various multinational companies like **Virtusa, CA Technologies, Wellsfargo** Bank and **DWS Australia**. Involved in software quality assurance and test life cycle. Work experience in Waterfall and Agile models of development. Experience in functional test automation, manual testing and performance testing using various tools such as Selenium Webdriver, Quality Center, JIRA, JMeter, ClearQuest, LoadRunner, SQLDeveloper, Oracle, MSSQL etc..

Work experience and knowledge on Cloud Services and SaaS model.

EDUCATION

Web Development Immersive

2016

General Assembly, Sydney
